REASONS FOR ALLOWANCE

(1)

The following is an examiner's statement of reasons for allowance: The closest prior art of record, WO 94/26086, discloses mixing polyethylene or polypropylene with other polymer material and extruding to form a non-homogenous material for forming pellets for treating sewage. The prior art of record does not disclose or suggest adding 0.01-5 wt% or 0.1-0.5 wt% of solid peroxide to plastic material wastes of substantially polyethylene or polypropylene and crosslinking the plastic material wastes in the presence of the peroxide to provide a substantially homogenous plastic material and forming the substantially homogenous material into a granular material, as claimed. Claims 29 and 45 claim wastes comprising "substantially" polyethylene or polypropylene, and the present specification discloses using wastes of minimum 94% polyethylene/polypropylene and maximum 3% impurities and maximum 3% other plastic material packagings and regranular or ground waste material with content of polyethylene/polypropylene of $\geq 97\%$.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
